GUIDELINES FOR THE AUTHOR 2007

ESTADISTICA is the scientific journal of the *Inter-American Statistical Institute* (IASI). It aims at publishing contributions about themes in theoretical and applied Statistics, giving emphasis to original applications and the solution of problems of wide interest to Statisticians in the American Region. Applications papers should include careful analysis of the problem at hand, have a clear presentation in order to contribute to the dissemination of methodology and good statistical practice, and contain adequate interpretation of the outcomes. Applications papers may also aim to contribute to a better understanding of the scope and limitations of the methods considered. Applications papers may tackle problems in any area of interest including public statistics, health, education, industry, etc. Theoretical contributions without a corresponding application will be published if they represent a significant advance in the knowledge of the discipline at the international scale and contain a clear indication of how the methods developed may be useful for relevant applications.

This publication is registered by some repertories such as, for example, the Current Index to Statistics (CIS) of the American Statistical Association (ASA) and the Institute of Mathematical Statistics (IMS). The editorial board of *Estadística* is of international scope, and is composed of outstanding statisticians.

If you wish to submit a paper, please send to the editor by e-mail two copies, one of them anonymous.

Editorial process is double-blind so the name and the full postal address of the authors to whom further correspondence is to be sent must appear only on one of the copies. Papers will be accepted in Word, in L^AT_EX, or in Scientific WorkPlace. During the refereeing process several aspects of the paper are evaluated, namely, whether or not it is considered: (a) important; (b) interesting; (c) correct; (d) original; and (e) adequate according to the profile of "Estadística". A paper will be published in this journal when it simultaneously satisfies these five requisites.
